

Pocket POS

Affordable, Simple and Reliable ePOS System

with Online Ordering integration

A complete till solution for your business

Works on android tablets

It even works offline!

HOW CAN WE HELP YOUR BUSINESS?

When you start up a business there is so much to consider. Therefore, an affordable, simple and efficient ePOS system can really help you manage many aspects of your business. Pocket PoS has been designed and implemented to be that tool. It doesn't matter if it's a restaurant, café, retail shop or even a launderette, our system is extremely flexible to suit your way of working. Your sales information can be effortlessly stored and accessed for analytic purposes. And now with the integration of our new online ordering system and built-in loyalty programme, your business will be able to have your own online ordering portal without any extra cost.

6 KEY FEATURES POCKET POS OFFERS

✓ **Offline Workable**

The majority of ePOS systems in the current market rely on internet connection to work properly. Sometimes internet subscription costs can bring a hefty bill to your business. Our system works offline, which means even without internet, Pocket PoS can fulfil your daily business needs with no problem at all.

✓ **Online Ordering**

The seamless integration with our online ordering system – PocketOrder has made us not just another ePOS provider! PocketOrder allows you to have your own online ordering portal accessible from your website without any extra cost. All your takeaway/delivery online orders are easily managed through our ePOS system. Every online order can be linked to a built-in loyalty programme so more customers will definitely return more often!

✓ **Staff Timesheet**

Our system's multi-functional features also include a staff log management. This feature lets business owners monitor their staff's timesheet more efficiently. It also allows business owner to further investigate their staff's sales activities if they need to.

✓ **Portable Devices**

Pocket PoS allows for the integration of multiple portable handheld devices. When you are making an order from the table, our hand-held devices enable you to send orders straight to kitchen and/or bar counter. Even on the busiest trading days, with the help of portable devices, your business efficiency will be fully maximized.

✓ **Kitchen Order Management**

When your kitchen is flooded with orders from both eat-in and takeaway/delivery customers, the last thing you want is for orders to be delayed or even missed. To manage them in an effective manner, our system separates the types of orders and prints them directly to the kitchen for preparation.

✓ **Sales Analytic**

Want to know what your best seller is? How your business has been doing so far? Our system is designed to fulfil your needs with just a few taps from your fingertips. Sales reports can be generated directly through Pocket PoS and exported to your PC for further analysis if required.
